

Construction of upgrades and improvements to the WWTP Generator Generator Replacement Project, 35 Townsend Street, Newton NJ, for \$1,012,000.00 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits to replace the existing emergency backup generator at the WWTP for residents and businesses in the Town of Newton to ensure backup emergency power is provided during power outages.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide
